PROFILE

With an extensive background in production and post I can provide on-set services that streamline and enhance the entire production to post workflow. These services include high-volume data management, on-set editing, colour correction, and dailies creation.

Professionally these services have been deployed on the set of high-profile feature films, broadcast television, commercials, and music videos for the likes of Amazon, BP, and Channel 4.

SKILLS: data management, on-set colour, dailies processing, workflow design, film editing

SOFTWARE: silverstack, shotput pro, livegrade, davinci resolve, premiere pro, and many more
